

## Cara memilih krim wajah Anda sesuai jenis kulit

Tekstur, bahan, dan kesalahan umum saat memilih krim wajah siang atau malam.

### **Dry and dehydrated skin**

Look for creams with ceramides, squalane, or panthenol and a rich texture. Apply on slightly damp skin to better retain water.

### **Combination and oily skin**

Prefer light gel-creams with niacinamide or hyaluronic acid. Moisturizing does not make skin greasy: lack of hydration often increases shine.

### **Sensitive or reactive skin**

Formulas with centella asiatica, madecassoside or mucin soothe redness. Introduce a new product every five days to identify reactions.
